

*you don't have to print this page if you do not want to build the display stand.
And if you do, you don't need to print it on 200 gsm cardstock.*

To build the display stand, print this page on regular printer paper, then cut out the parts and trace them on thick posterboard (1.5-2 mm thick). You will need to trace and cut out part B twice to glue both versions in the slits you have to cut out off part A. Glue part C in between as support.

Don't forget to cut out the two holes on part 1 if you want to use the display stand!
